Exclusive to MyOwn Tel

Home Network Setup

Absolutely Free!

Setting up my broadband for me?

That's the service you can expect from MyOwn Tel.

MyOwn Tel is a full-service telecommunications and broadband company, we believe that helping you get your broadband up and running should be part of the service.

Other broadband providers expect you to setup the internet in your home yourself. This is fine if you are a technology whiz, but if this is not the case, you may need to pay an expensive computer technician to get your broadband up and running on your computer.

MyOwn Tel is offering all Sanctuary Cove residents who take up our telephone and broadband service, complimentary on-site internet setup at the time of installation. Simply request this service when you sign-up and you can have the peace of mind that comes with knowing that your internet will be setup for you.

Call 1300 859 152 to request your complimentary broadband setup when you join MyOwn Tel and experience our superior service.

Disclaimer: Complimentary broadband setup service includes configuration of existing equipment only and is conditional on taking up the MyOwn Tel fixed line telephone and broadband service. Additional hardware and new internal cabling is not included.
